

My wife and I are retired and travel around this great country by RV. Satellite radio is a godsend to us and it is inconcievable that anyone in government would even entertAIN THE NOTION TO DO AWAY WITH IT. There would be no gain to the radio stations because we would only play CD's rather than listern to the endless drivel that passes for advertising. There is plenty of room for satellite radio in our country as there is for cable TV, Satellite TV and over the air programming. Do not under any circumstances succumb to the pleadings of those with huge dollars to spend on lobbying to take something away from the little people in this country.
